

The Intake System

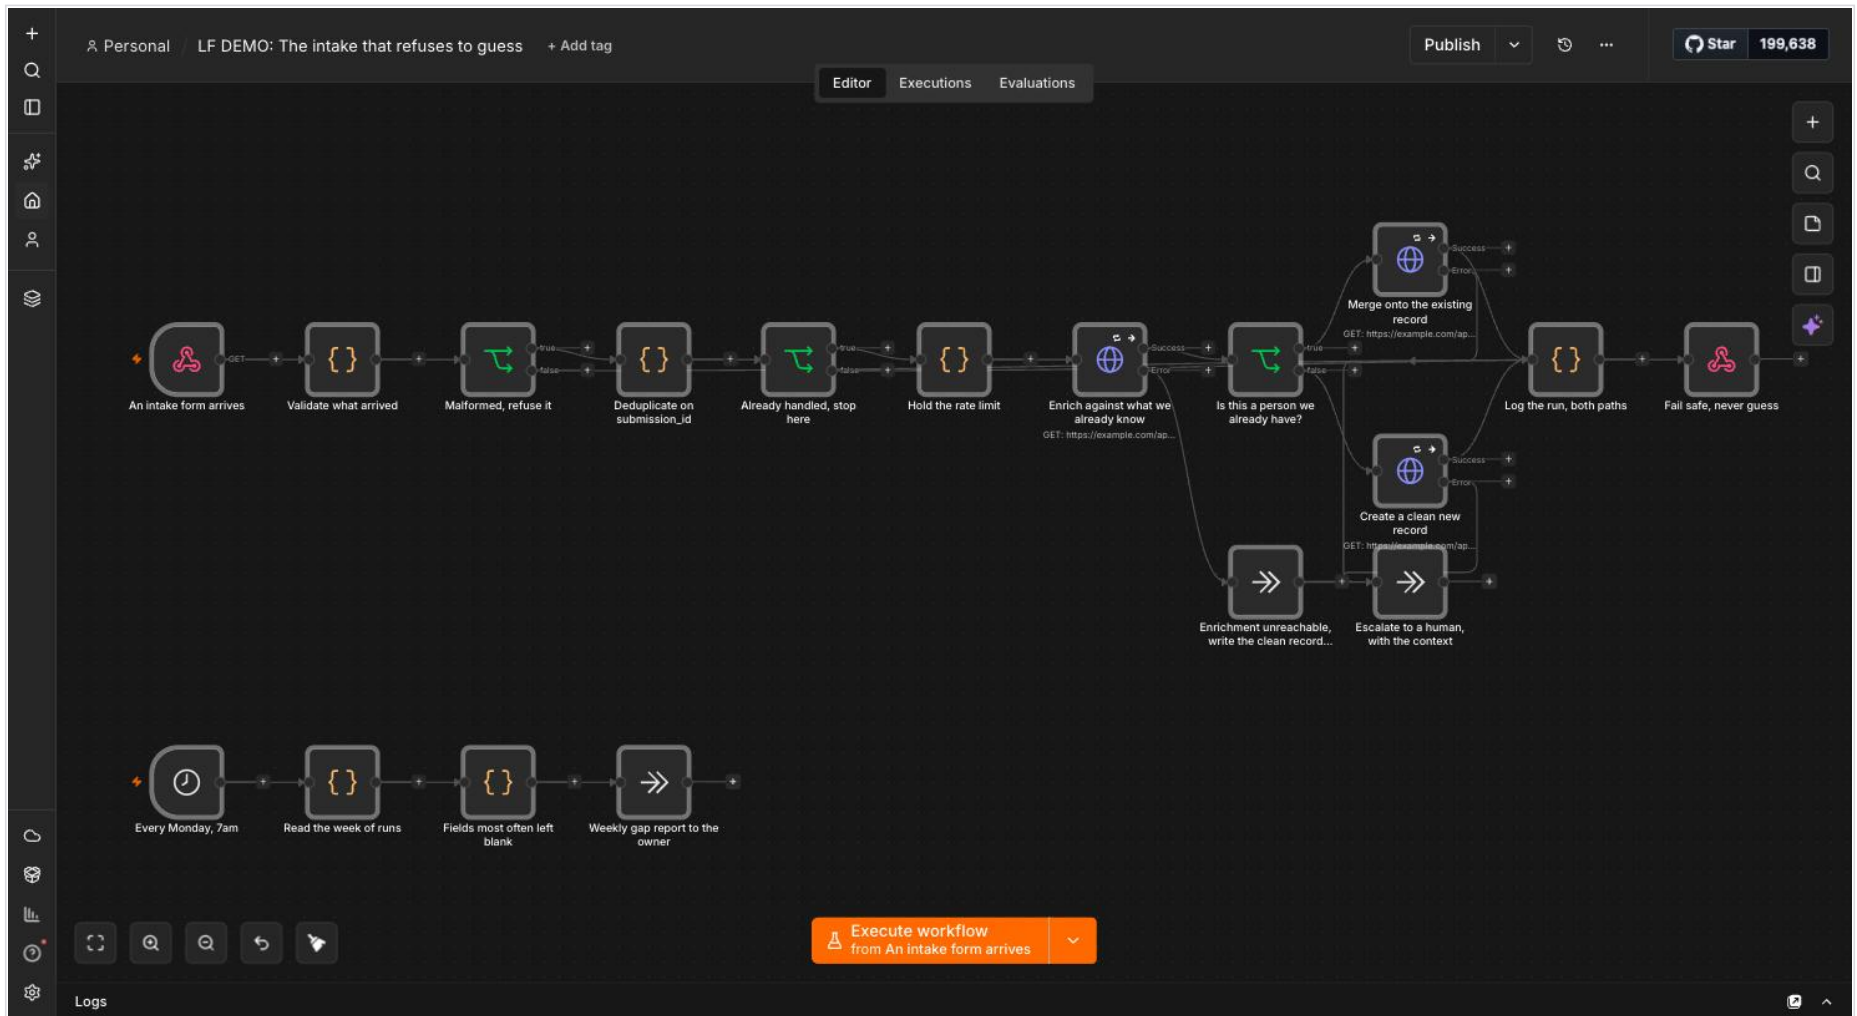

data-collection · built in zapier

A half-record in the CRM is worse than no record, because it looks complete.

What it connects to: The form and the system of record are almost never the same tool. Everything expensive happens in the gap: duplicates, half-records, and fields that mean different things on each side.

1 of 4 SYSTEM

Here's the intake spine: validate, refuse what's malformed, dedupe, then write a clean record.

2 of 4 THINKING

The validation gate is the part that matters — it refuses rather than guessing.

The screenshot displays a workflow editor interface with a dark theme. The main workspace is divided into three vertical panels: INPUT, CONFIGURATION, and OUTPUT.

- INPUT Panel:** Contains the text "No input data" and a button labeled "Execute previous nodes" with the subtitle "to view input data".
- CONFIGURATION Panel:** Features a tabbed interface with "Parameters" and "Settings" tabs. The "Parameters" tab is active, showing a "Conditions" section with a text area containing the JSONPath expression `{{ $json.existing === true && $json.confidence > 0.8 }}`. To the right of the text area is a dropdown menu currently set to "is true". Below the conditions section is a toggle switch labeled "Convert types where required" which is currently turned off. At the bottom of the configuration panel is a section labeled "Options" with a "+ Add option" button. An orange "Execute step" button is located at the top right of the configuration panel.
- OUTPUT Panel:** Contains the text "No output data" and a button labeled "Execute step" with the subtitle "to view output data".

At the bottom of the interface, there is a "Logs" panel and a footer area with the text "I wish this node would..." and a small icon.

3 of 4 THEIR-WORLD

The intake form itself, with real field types bound to CRM properties.

The screenshot displays the Zapier 'Zap workflows' interface. The top navigation bar includes a home icon, a search bar, and the text 'Zap workflows'. The user's profile 'Seth Forte (P...)' and the current workflow 'Untitled Zap' (Draft) are shown. The interface is divided into three main sections:

- Workflow Canvas:** A central workspace with a grid background. It contains two steps:
 - Step 1:** A 'Webhooks by Zapier' trigger labeled '1. Catch Hook'.
 - Step 2:** An 'Action' step labeled '2. Select the event for your Zap to run'.Vertical lines with plus signs connect the steps, indicating a sequential flow.
- Configuration Panel (Right):** A sidebar for configuring the selected step ('1. Catch Hook'). It includes tabs for 'Setup', 'Configure', and 'Test'. The 'App' is set to 'Webhooks by Zapier' (Premium). The 'Trigger event' is set to 'Catch Hook'. A 'Continue' button is at the bottom.
- Bottom Bar:** A dark bar with icons for 'Library', 'Zaps', 'Zap', and 'Zap'.

At the bottom right, a version string is visible: 'ver. v2026-08-07t11:38-f911f3f7'.

4 of 4 RESULT

And the records it produces, clean and deduplicated.

The screenshot displays the Zapier workflow editor interface. The main workspace shows a vertical sequence of steps connected by plus signs. The visible steps are:

- A partially visible step at the top.
- A step labeled "Filter by Zapier" with a green checkmark and the text "2. Filter conditions".
- A step labeled "Formatter by Zapier" with the text "3. Text".

The right sidebar is open to the configuration panel for the "3. Text" step. It includes tabs for "Setup", "Configure", and "Test". The "Configure" tab is active, showing the "Transform" dropdown set to "Titlecase". Below this, there is a notification box about "In-line Formulas" and a specific instruction: "Convert all characters in a string to titlecase". The "Values" section shows an "Input" field with the value "1. Full Name: dana WHITFIELD". A "Continue" button is at the bottom of the configuration panel.

At the top of the editor, a notification states: "Copilot can fully configure your workflow" with a "Build it" button. The top bar shows the user "Seth Forte (P...)" and the workflow name "Untitled Zap" in "Draft" status. The bottom left has a "Library" button and icons for various actions. The bottom right corner displays the version number: "ver. v2026-08-07t11:36-191113f7".
