

The Rescue

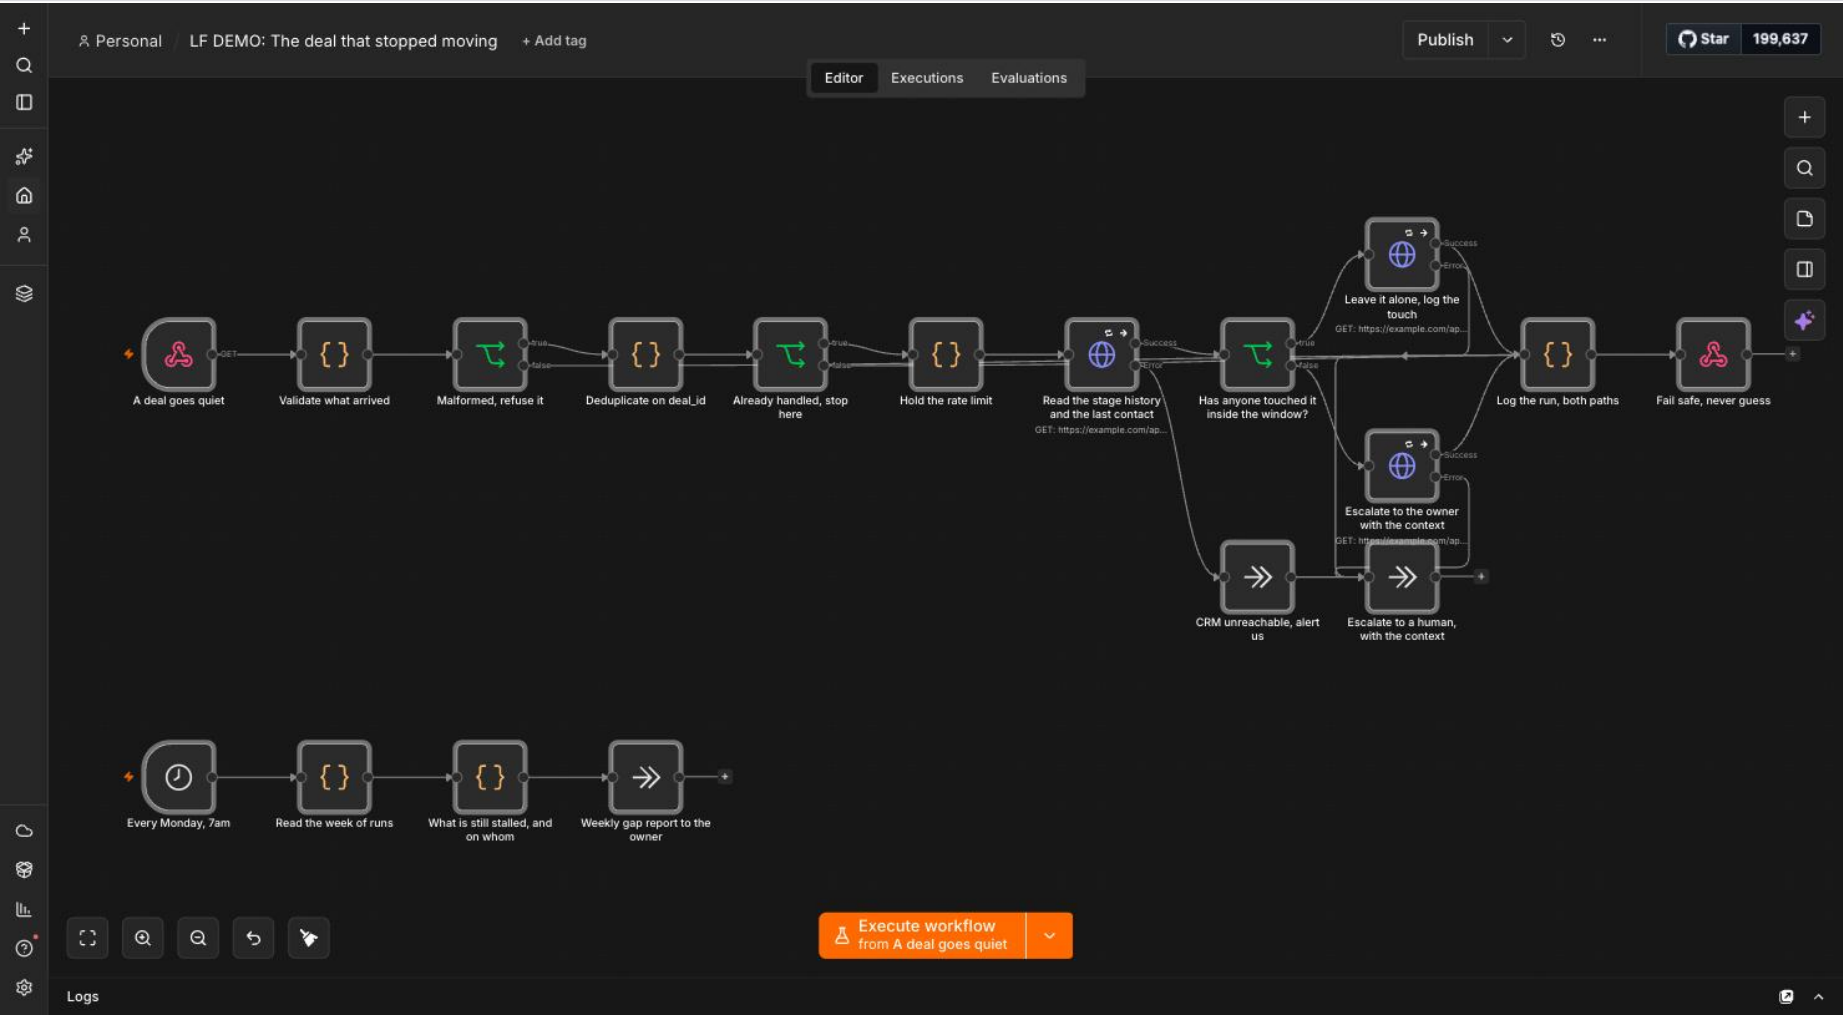

stalled-deal-escalation · built in hubspot

Your stalled-proposal problem is the one I'd fix first, because it's the one quietly costing you deals.

What it connects to: The CRM knows the deal stalled. It does not know who to chase, on what ladder, or how to prove it chased. That state has to live somewhere the CRM cannot hold it.

1 of 4 SYSTEM

Here's the system that watches for a deal that hasn't moved and escalates before it goes cold.

2 of 4 THINKING

This is the gate underneath it — it checks whether anyone actually touched the deal, not just whether time passed.

 Has anyone touched it inside the window?

INPUT

→|

ParametersSettings

Execute step

Conditions

fx

{{ \$json.touchedRecently !== true && \$json.idleDays >= 7 && \$json.stage !== 'closed' }}

☒ is true

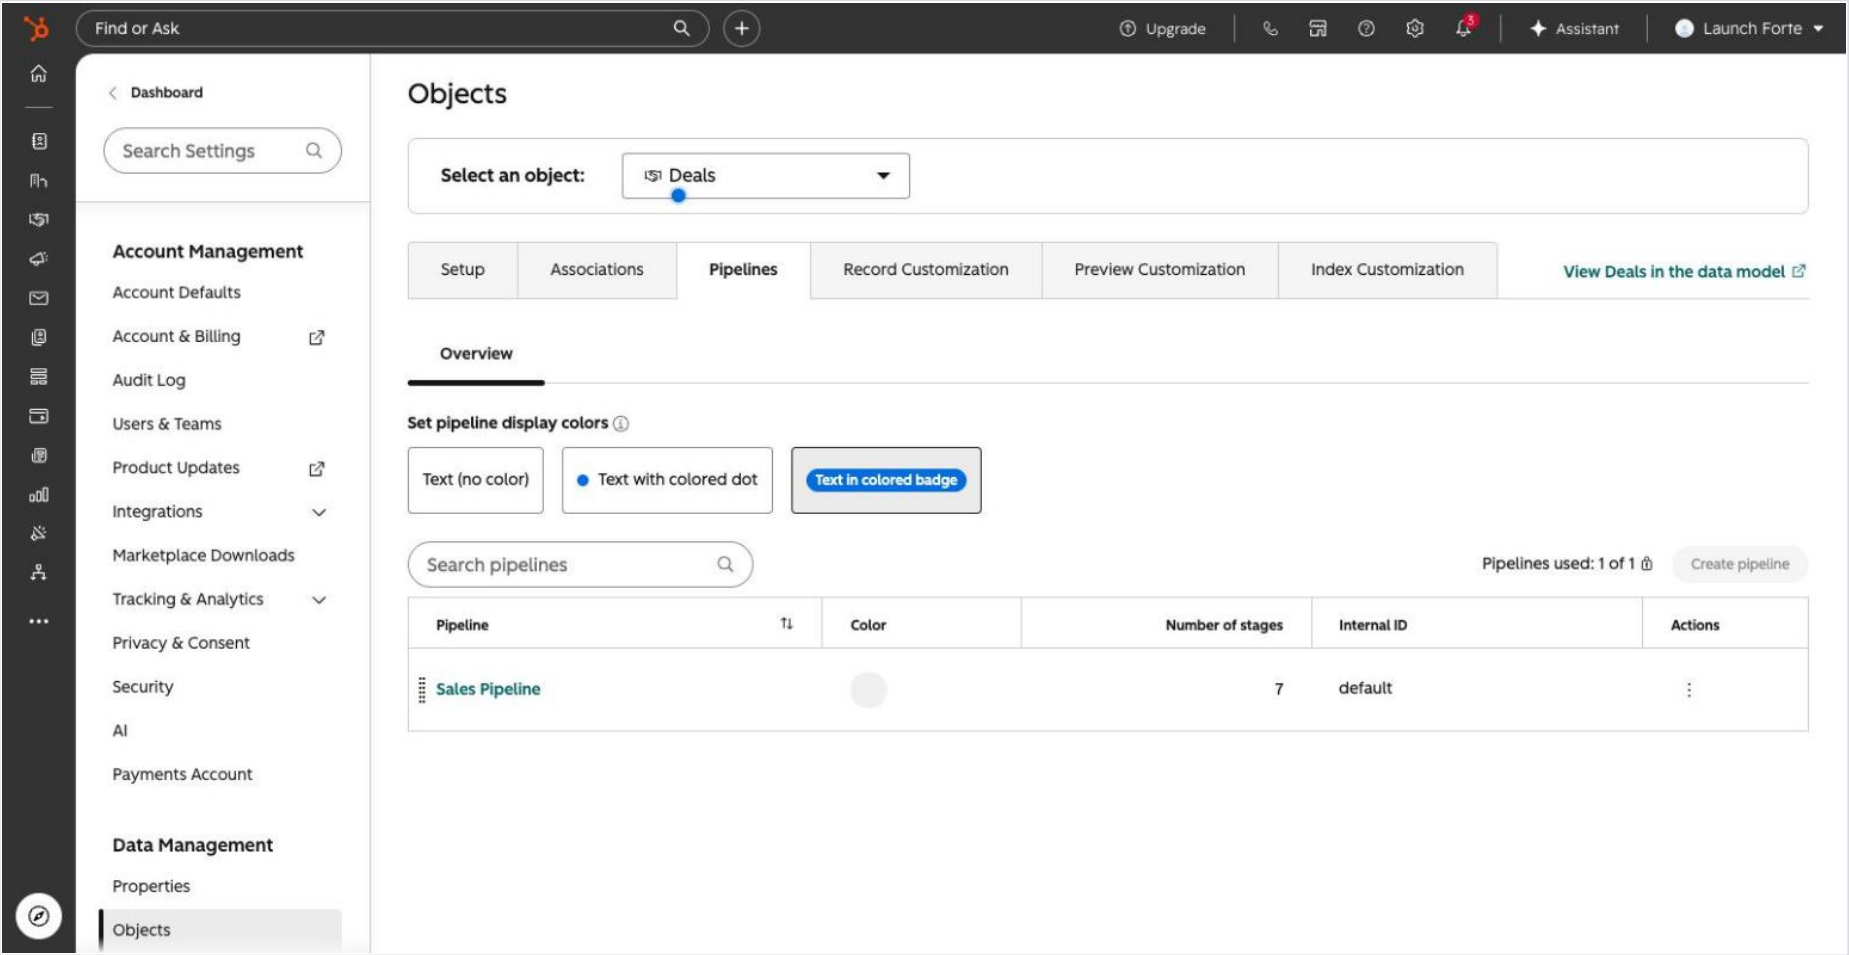

+ Add condition

☐ Convert types where required

Options

+ Add option

The same pattern inside the CRM itself — the escalation branch, with the owner and the manager step both wired.

4 of 4 RESULT

And this is what it looks like once it's running — every stage worked, and the stalled one flagged rather than forgotten.
