

The Onboarding Build

client-onboarding · built in hubspot

The first 48 hours set the tone for the whole engagement, and they're usually improvised.

What it connects to: Won in the CRM has to become tasks in the project tool, a folder somewhere, and an intake the client actually returns. Three systems, one moment.

1 of 4 SYSTEM

Here's what fires the moment a deal flips to Won — welcome, checklist, intake, escalation.

2 of 4 THINKING

It escalates if the intake hasn't come back by day two, rather than waiting for someone to notice.

The screenshot displays a workflow editor with a central configuration panel and two side panels labeled INPUT and OUTPUT.

Central Panel:

- Title:** Did the intake come back inside two days?
- Parameters / Settings:** A tabbed interface with 'Parameters' selected.
- Conditions:** A section for defining conditional logic.
 - Condition 1:** A JSON-based condition: `{{ $json.intakeReturned === true && $json.n.dayCount <= 2 }}`. A dropdown menu next to it shows 'is true'.
 - + Add condition:** A button to add more conditions.
 - Convert types where required:** A toggle switch that is currently turned off.
 - Options:** A section for additional options with a **+ Add option** button.
- Execute step:** An orange button to execute the current step.

INPUT Panel:

- |** A visual indicator for data flow.
- No input data** text.
- Execute previous nodes** button.
- to view input data** text.

OUTPUT Panel:

- |→** A visual indicator for data flow.
- No output data** text.
- Execute step** button.
- to view output data** text.

Footer:

- Logs** tab on the bottom left.
- ? I wish this node would...** text at the bottom center.
- Docs** and **×** icons on the top right.

Running in the CRM, triggered on the status change rather than a stage drag.

4 of 4 RESULT

And the onboarding assets it assembles.

The screenshot displays the HubSpot landing page editor interface. At the top, a dark navigation bar contains links for Back, File, Edit, View, Settings, and Help. The page title is 'SAMPLE - Free Estimate Landing Page (draft)', and it is marked as a 'Draft'. On the right, there are buttons for 'Autosaved', 'Preview', and 'Publish'.

Below the navigation bar, a toolbar includes icons for desktop and mobile views, a search icon, and a 'Settings' button. A notification banner at the top right states: 'Remove HubSpot branding from this landing page, and everywhere else. Plus, unlock premium features with Starter Customer Platform. Upgrade'.

The left sidebar is titled 'Add modules' and includes a search bar. It lists various module categories: Theme (18), Text (4), Commerce (3), Design (9), Functionality (3), and Forms and Buttons (2). The 'Theme' category is expanded, showing a grid of module options: Accordion, Anchor, Button, Card, Countdown timer, Feature list, Heading, and Horizontal menu. A 'Beta' badge is visible next to the 'Button' module.

The main editing area shows a landing page layout. It begins with a 'No logo' placeholder with the text 'Click to add a logo'. Below this is a large heading: 'Watch for a sneak peek of the event'. Underneath the heading is a paragraph: 'Watch our teaser video for a glimpse into the inspiring keynotes, interactive workshops, and networking opportunities that await'. At the bottom right, there are 'Chat' and 'Help' buttons.
