

The Lead Router

lead-routing · built in ghl

Five minutes is the whole game. A lead that waits an hour is worth a fraction of one answered fast.

What it connects to: The form is in one system, the owner roster in another, and the SLA clock in neither. The clock is the integration.

1 of 4 SYSTEM

Here's the routing system end to end — score, assign, contact, and escalate on silence.

2 of 4 THINKING

The part most builds miss is the SLA timer: this reassigns when the first owner doesn't touch it.

Is this one worth the fast lane?

3 of 4 THEIR-WORLD

Same pattern running inside a real CRM, with the merge fields and the branch on lead source.

4 of 4 RESULT

And the segmentation behind it, so the right leads reach the right closer.

The screenshot displays a workflow builder interface. At the top, there's a header with a back arrow, 'Workflows list', a document icon, and 'New Workflow : 1786051199417' with an edit icon. On the right of the header are icons for 'SF', a document, undo, redo, and a 'Save' button. Below the header, there's a 'Standard builder' dropdown and tabs for 'Builder', 'Settings', 'Enrollment history', and 'Execution logs'. On the right side of this section are 'Test workflow', 'Draft' (with a toggle), and 'Publish' buttons.

The main workspace is a grid where a workflow is being built. It starts with a trigger block labeled 'Customer Replied' with a speech bubble icon and 'No filters applied'. Below the trigger are icons for copy, delete, and 'Stats'. A dashed box labeled '+ Add new trigger' is next to it. A line connects the trigger to an action block labeled 'Please select action' with a cursor icon. Below this is an 'END' button. A small preview window is visible at the bottom right of the workspace.

On the right side, there's a panel titled 'Actions' with a search bar labeled 'Search actions'. Below the search bar are tabs for 'Actions' and 'Apps'. Under the 'Actions' tab, there's a list of actions under the category 'Contact':

- Create contact
- Find contact
- Update contact field
- Add contact tag
- Remove contact tag
- Assign to user
- Remove assigned user
- Enable/disable DND
- Add to notes

Each action has a right-pointing arrow next to it. At the bottom of the actions list are icons for undo, redo, and a refresh icon.
