

The Follow Up

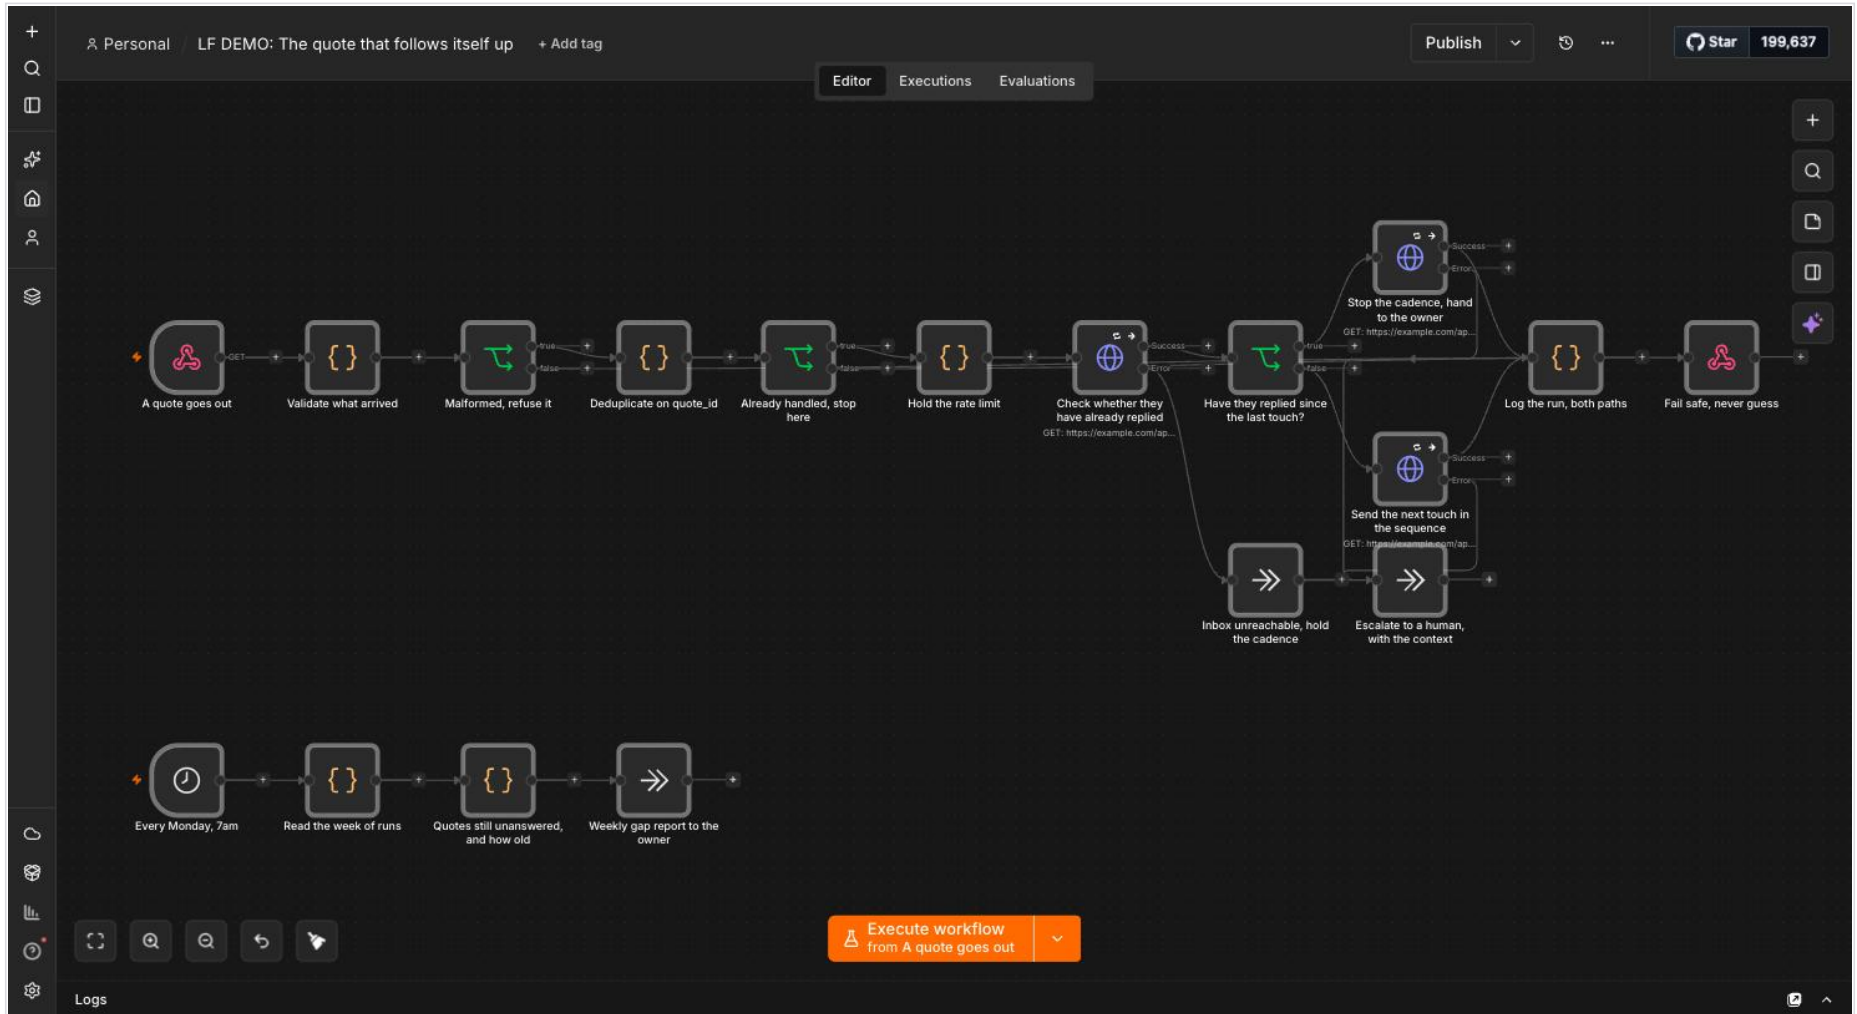

quote-follow-up · built in pipedrive

Following up on a quote is nobody's actual job, so it quietly becomes nobody's.

What it connects to: The quote lives in the CRM and the reply lands in a mailbox. Stopping the cadence means the mailbox has to be able to reach back into the CRM.

1 of 4 SYSTEM

Here's the cadence — day 2, day 5, day 9, then nurture.

2 of 4 THINKING

Every touch checks for a reply first and stops dead the moment they answer. That gate is what separates follow-up from nagging.

Have they replied since the last touch?
