

The Reporting Layer

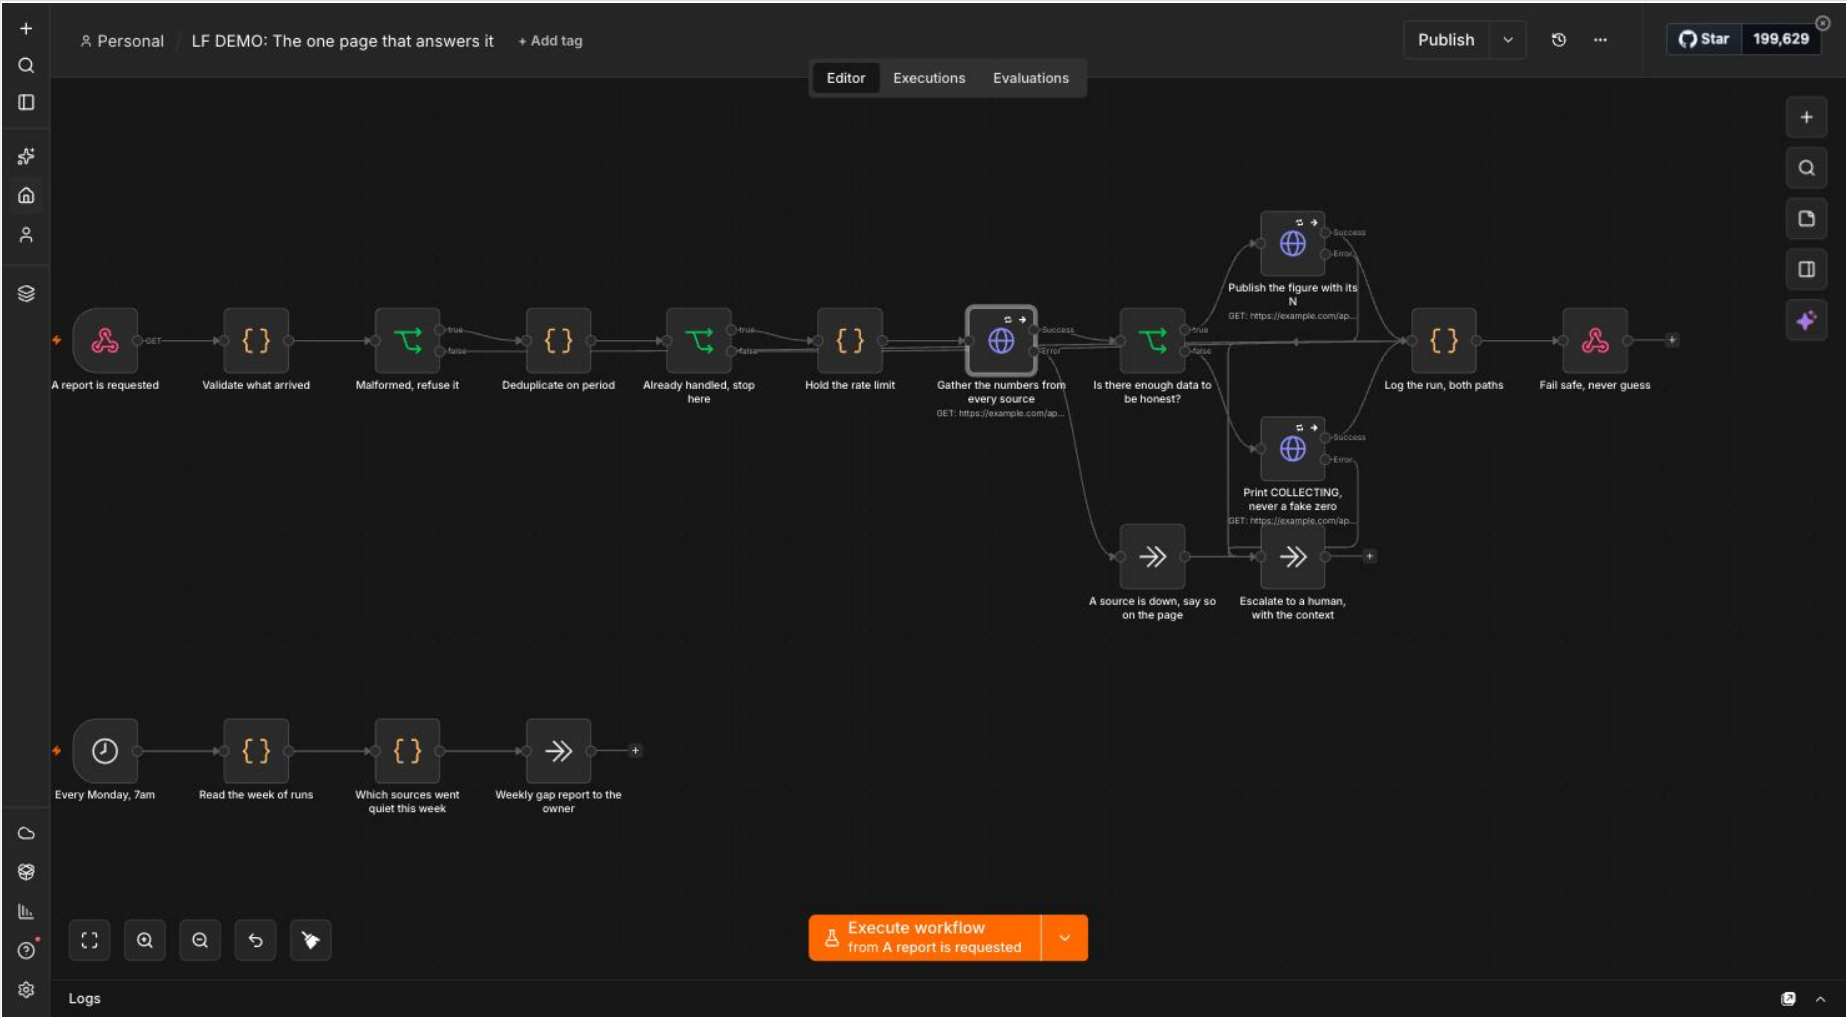

reporting · built in airtable

Most dashboards lie by omission. A zero that means 'unknown' looks exactly like a zero that means zero.

What it connects to: Every source counts a lead slightly differently. The reporting layer is where you decide, once and in writing, whose definition wins.

1 of 4 SYSTEM

Here's the system that gathers from every source and only publishes once there's enough data to be honest.

2 of 4 THINKING

Below the threshold it prints COLLECTING rather than a number that reads as fact.

 Is there enough data to be honest?

INPUT

ParametersSettings

Execute step

Conditions

fx

`{{ $json.n >= 30 && $json.sourcesRead == $json.sourcesExpected }}`

is true

+ Add condition

☐ Convert types where required

Options

+ Add option
