

The Reporting Layer

reporting · built in hubspot

Most dashboards lie by omission. A zero that means 'unknown' looks exactly like a zero that means zero.

What it connects to: Every source counts a lead slightly differently. The reporting layer is where you decide, once and in writing, whose definition wins.

1 of 4 SYSTEM

Here's the system that gathers from every source and only publishes once there's enough data to be honest.

2 of 4 THINKING

Below the threshold it prints COLLECTING rather than a number that reads as fact.

 Is there enough data to be honest?

INPUT

ParametersSettings

Execute step

Conditions

fx

`{{ $json.n >= 30 && $json.sourcesRead == $json.sourcesExpected }}`

+ Add condition

☐ is true

Convert types where required

Options

+ Add option

→|

The reporting layer running live on real records.

And the same layer on a second stack — the numbers move, the structure does not.
