

The Rescue

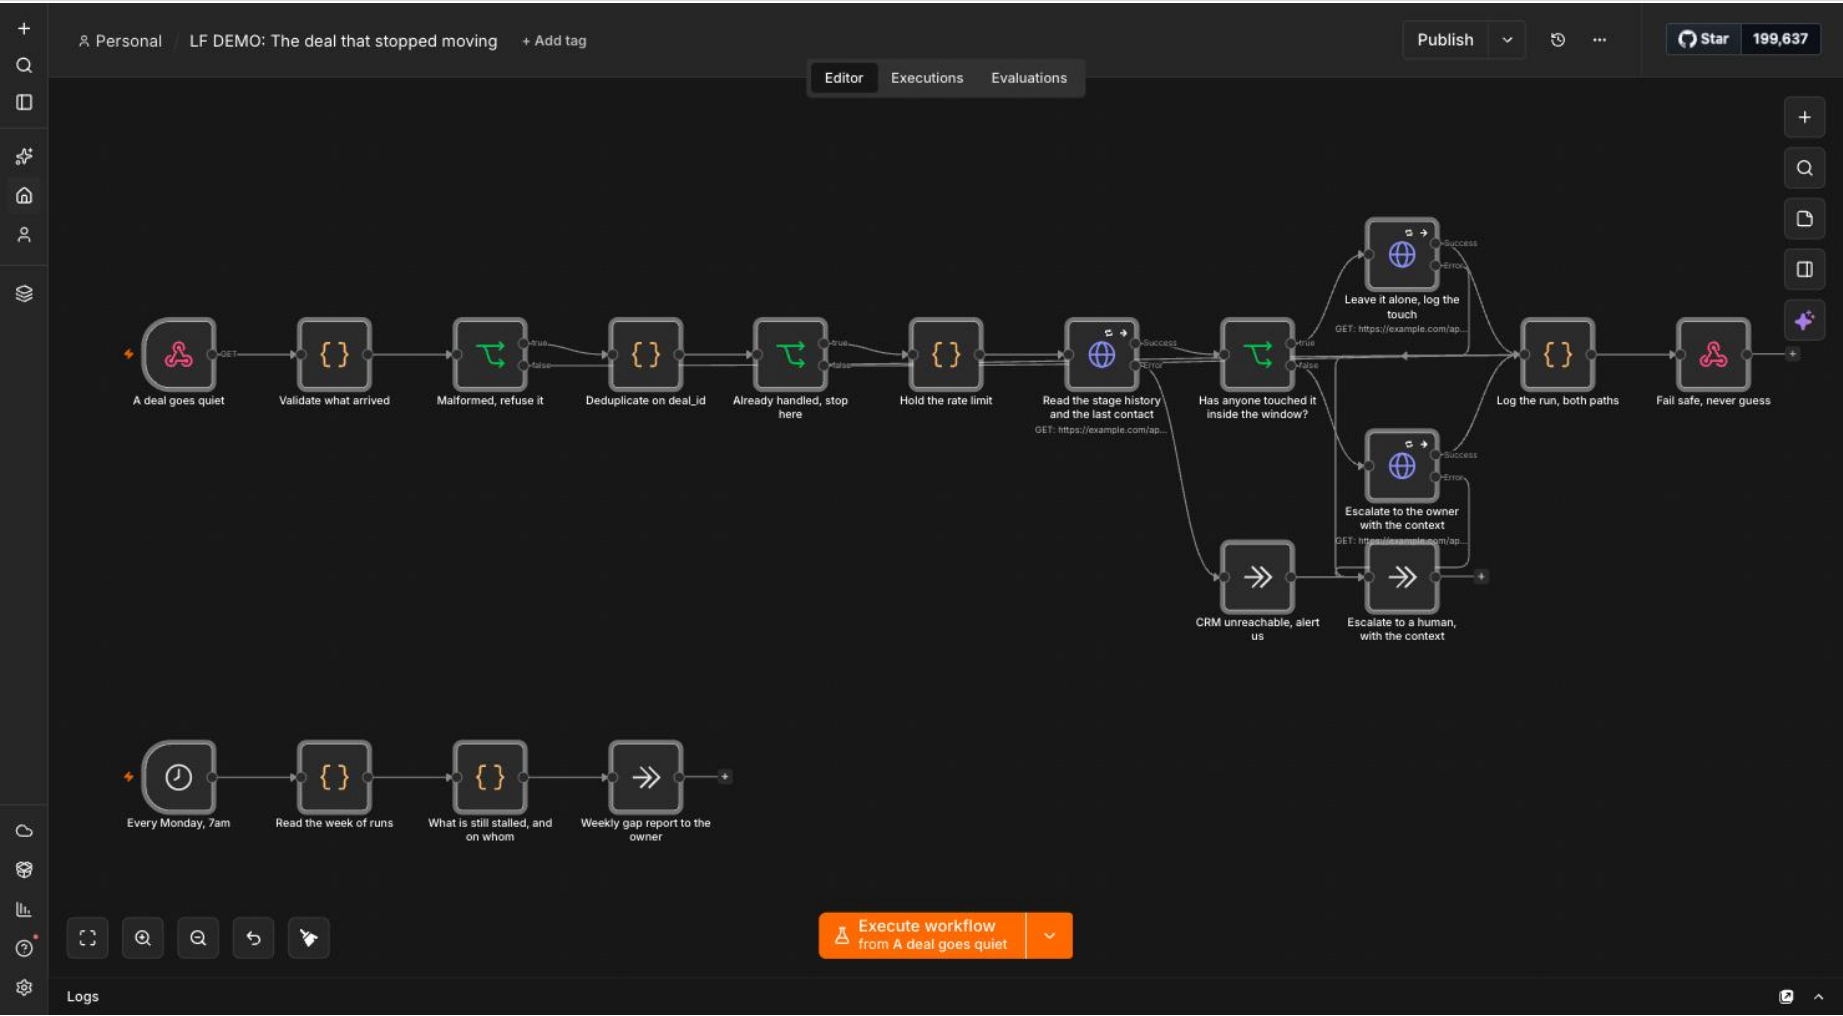

stalled-deal-escalation · built in zapier

Your stalled-proposal problem is the one I'd fix first, because it's the one quietly costing you deals.

What it connects to: The CRM knows the deal stalled. It does not know who to chase, on what ladder, or how to prove it chased. That state has to live somewhere the CRM cannot hold it.

1 of 4 SYSTEM

Here's the system that watches for a deal that hasn't moved and escalates before it goes cold.

2 of 4 THINKING

This is the gate underneath it — it checks whether anyone actually touched the deal, not just whether time passed.

 Has anyone touched it inside the window?

ParametersSettings

Execute step

Conditions

fx

{{ \$json.touchedRecently !== true && \$json.idleDays >= 7 && \$json.stage !== 'closed' }}

☒ is true

+ Add condition

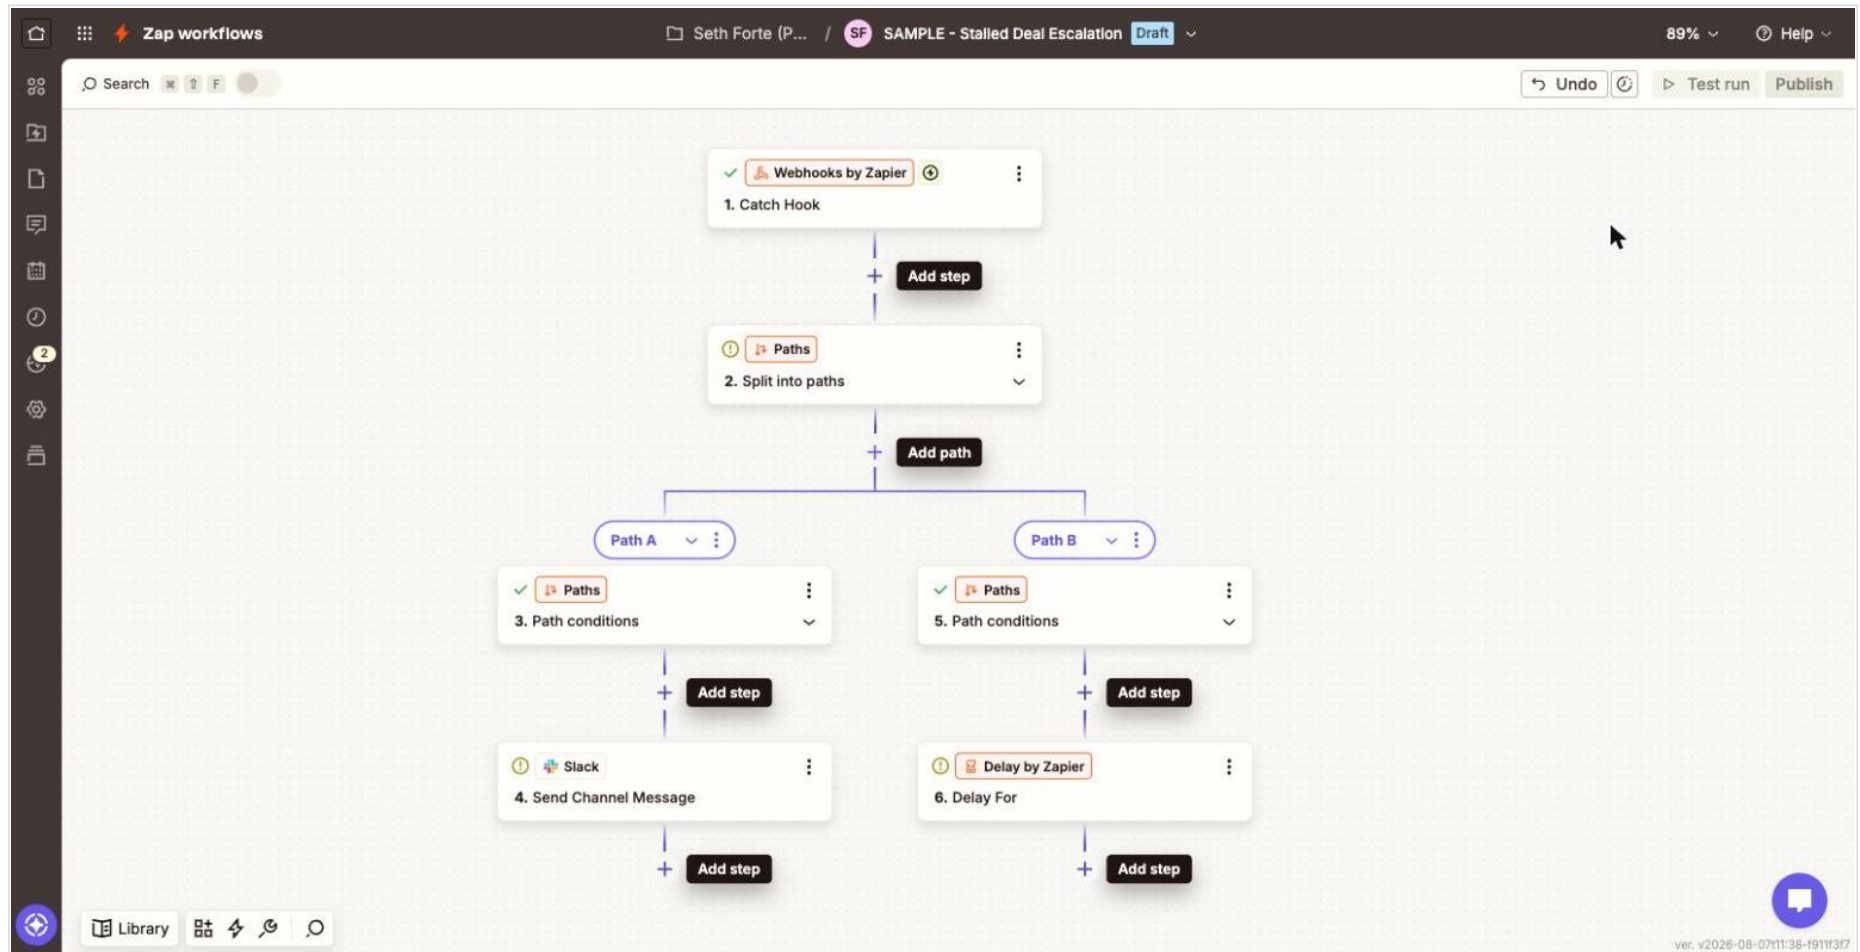

☐ Convert types where required

Options

+ Add option

3 of 4 THEIR-WORLD

The same pattern inside the CRM itself — the escalation branch, with the owner and the manager step both wired.

4 of 4 RESULT

And this is what it looks like once it's running — every stage worked, and the stalled one flagged rather than forgotten.

The screenshot displays the Zapier workflow editor interface. At the top, the header shows 'Zap workflows' and the current workflow is 'Untitled Zap' in 'Draft' status. A notification at the top center states 'Copilot can fully configure your workflow' with a 'Build it' button. The main workspace shows a workflow starting with '2. Split into paths'. This step branches into two paths: 'Path A' and 'Path B'. Path A leads to '3. Path conditions', which then leads to '4. Select the event for your Zap to run' (labeled as an 'Action'). Path B leads to '5. Path conditions', which then leads to '6. Select the event for your Zap to run' (also labeled as an 'Action'). Each path has an 'Add step' button. On the right side, a panel titled '3. Path conditions' is open, showing configuration options. It includes a 'Configure & test' section with a 'Custom rules' dropdown. Under 'Only continue if', there is a rule '1. Stall Reason' with the condition '(Text) Exactly matches' and the value 'no_response'. A '+ And' button is visible below the rule. At the bottom of the panel, there is a 'Continue' button and a message: 'Nice work - now let's test it out! We'll test these conditions against the example data we receive.'
